Subject: TNAML lighting fixtures

Dear Mr. Geluk,

After using the TNAML lighting fixtures for several years now on our installations: JB 114; JB 115; JB 117 and JB 118 we are pleased to inform you that the quality of the TNAML lighting fixtures, both standard and emergency version, are functioning to our full satisfaction and without problems.

The sometimes extreme offshore conditions, to which the lighting fixtures and our entire installations are exposed to, have had no effect on the material. The TNAML lighting fixtures remain undamaged and waterproof contrary to many other brands.

We look forward to continuing our good relation with TechNed Benelux BV in the future.

Best regards,

Hugo Cramer  
Technical Manager Jack-Up Barge B.V.
